EduGenie: Google Gemini Powered Learning Assistant

Team ID	SWTID-2026-1940
Project	EduGenie: Google Gemini Powered Learning Assistant

Project Description

EduGenie is an AI-powered educational assistant designed to make learning simpler and more accessible. It helps students ask academic questions and receive concise answers, understand complex concepts through simplified explanations, generate quizzes, summarize long passages, and receive personalized learning recommendations. The project uses a FastAPI backend with an HTML/CSS web interface and integrates Google Gemini for learning features.

Scenarios

Scenario 1: A student asks a question such as “Which is the largest ocean?” and receives an AI-generated answer.

Scenario 2: A student studies the Pythagoras Theorem and uses the quiz feature to check their understanding.

Scenario 3: A learner studying SQL requests a structured learning path from beginner to advanced topics.

Team Members and Work Allocation

No.	Team Member	Assigned Responsibilities
1	**R. Priyadharshini**	Project coordination and FastAPI backend integration; connect the modules to the main application.
2	**S. Shobana**	Question-and-Answer module and simplified concept Explanation module.
3	**S. Rakshana**	Quiz generation module and Summary module; check the generated outputs.
4	**E. Shylaja**	Personalized Learning Path / Recommendation module and learning-resource organization.
5	**S. Sheeba**	HTML/CSS frontend design, frontend-backend integration, functional testing, and project documentation.

Work allocation follows the team-member order provided. Responsibilities are divided according to the modules and workflow described in the project document.
