Coding & Solution

Date	15 March 2026
Team ID	SWTID-2026-1940
Project Name	Team Enrollment Confirmation - EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of the implemented EduGenie solution. The submission should demonstrate working functionality, clean code practices, and alignment with the defined project requirements.

Instructions:

1. Ensure the code is well-structured, commented, and follows best practices for the chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to the code repository (e.g., GitHub / GitLab) in the table below.

Solution Summary

Field	Details
Repository Link / URL	To be updated with the team's GitHub / GitLab repository link
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	FastAPI, Jinja2; Google Gemini API integration
Key Features Implemented	AI-powered academic Q&A; quiz generation; study-material summarization; concept simplification; personalized learning-path support; study history/session tracking.
Pending / Incomplete Features	Final deployment configuration, extended multimodal capabilities, and any remaining integration/testing items to be finalized by the team.
Setup / Run Instructions	Create a Python 3.10+ virtual environment, install dependencies from requirements.txt, configure the Gemini API key in environment variables, and run the FastAPI application with Uvicorn.

Team Members & Work Allocation

S.No.	Team Member	Assigned Work
1	R.Priya dharshini	**Backend & AI Integration Lead:** FastAPI backend, Gemini API integration, API endpoints, authentication/session flow, and core application integration.
2	S.Shobana	**Frontend & UI/UX:** HTML/CSS/JavaScript interface, responsive dashboard, navigation, forms, user interaction flow, and frontend-backend integration.
3	S.Rakshana	**Quiz & Assessment Module:** quiz generation workflow, question/answer handling, scoring logic, validation, and assessment-related testing.
4	E.Shylaja	**Learning Support Modules:** Q&A/concept explanation, summarization and learning-path functionality, prompt design, and output quality checks.
5	S.Sheeba	**Testing, Documentation & Integration:** test cases, error handling checks, README/setup documentation, integration testing, bug tracking, and final submission support.

Code Quality Checklist

S.No.	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	
2	Meaningful variable and function names are used	
3	Code includes comments / documentation where necessary	
4	Error handling is implemented for critical operations	
5	The application runs without critical errors	
6	Code is committed to a version control repository	

Additional Notes / Comments:

Team Members: R.Priya dharshini, S.Shobana, S.Rakshana, E.Shylaja, S.Sheeba
